"Points" column is the points value computed based on placing. There are two possible points settings:

If the class IS related to a Circuit division in the show, points will use the circuit division points settings.

If the class is NOT related to a circuit division the points are computed using the following default values:

The points value is computed using standard points values: 10, 6, 4, 2, 1, 0.5

For classes flagged as Bonus points classes points values are: 15, 9, 6, 3, 2, 1

Points are only computed for placings 1 through 6.

In either case, if the class has a points multiplier defined it is shown in the class name heading and is factored into the points computed.
